About Me

- I am a highly skilled full stack developer with a strong background in both front-end and back-end technologies.
- I have extensive experience in designing, developing, and maintaining web applications, utilizing languages and frameworks such as HTML, CSS, JavaScript, Node.js, and SQL.
- My expertise in integrating APIs and optimizing user experience has enabled me to deliver high-quality solutions that meet client specifications and enhance operational efficiency.

Work Experience

SDE – KisanCash

Jan 2025 – Present | New Delhi

- Developed and optimized responsive, scalable web applications using React, Node.js, Express, and MongoDB.
- Built intuitive UI components with Tailwind CSS to enhance user experience and accessibility.
- Integrated REST APIs for seamless data flow between frontend and backend services.
- Improved performance and efficiency of web applications by implementing best practices in frontend and backend development.
- Collaborated with cross-functional teams to deliver fintech solutions tailored for the agricultural sector.
- Ensured application security, performance optimization, and progressive web app (PWA) support.

Frontend Developer Intern – Mentornix Consultancy PVT LTD

07/2024 – 01/2025 | remote

- Built responsive web applications using React.js, enhancing user interface performance by 20%.
- Collaborated with a team of senior developers to implement reusable components, improving development efficiency by 15%.
- Converted Figma designs into pixel-perfect, responsive HTML/CSS layouts, ensuring 100% alignment with UI/UX guidelines.
- Optimized website performance, reducing page load times by 30% through best coding practices.

Projects

FarmStock – Fintech for Farmers

- A fintech web platform for farmers to manage stock, sales, invoices, and credits. The app includes:
- Inventory Management: Add, update, and track product stock with low stock alerts.
- Billing & Invoices: Generate invoices, track sales, and manage purchase orders.
- Credit System: Monitor pending credits, record payments, and send due reminders.
- Progressive Web App (PWA) Support: Enables offline usage and easy installation.
- API Integration: Fetch real-time stock, sales, and credit details through backend APIs.

QuickTalk – A cozy place for meaningful chats

- Built a real-time chat application using React.js, Node.js, Express.js, and Socket.IO, enabling instant messaging and seamless communication.
- Designed and implemented a secure user authentication system using JWT, ensuring robust access control.
